**Isizulu** ,1893 Public Intellectuals in South Africa Chris Broodryk,2021-07-01 This edited collection gives voice to neglected public intellectuals in the arts humanities and journalism in South Africa who gave voice and presence to those who have been marginalized and silenced in South African history Edward Said described a public intellectual as someone who uses accessible language to address a designated public on matters of social and political significance The essays in Public Intellectuals in South Africa apply this interpretive prism and activist principle to a South African context and tell the stories of well known figures as well as some that have been mostly forgotten They include Magema Fuze John Dube Aggrey Klaaste Mewa Ramgobin and Koos Roets alongside marginalized figures such as Elijah Makiwane Mandisi Sindo William Pretorius and Dr Thomas Duncan Greenlees The essays capture the thoughts and opinions of these historical figures who the contributors argue are public intellectuals who spoke out against the corruption of power promoted a progressive politics that challenged the colonial project and its legacies and encouraged a sustained dissent of the political status quo Offering fascinating accounts of the life and work of these writers critics and activists across a range of historical contexts and disciplines from journalism and arts criticism to history and politics it enriches the historical record of South African public intellectual life This volume makes a significant contribution to ongoing debates about the value of research in the arts and humanities and what constitutes public intellectualism in South Africa The relative clause formation in Zulu Alexandra Orth,2011-05-09 Seminar paper from the year 2009 in the subject English Language and Literature Studies Linguistics grade 2 0 University of Freiburg English Seminar course HS Grammaticalization language English abstract My term paper deals with one of the South African languages the Zulu language In my grammar report accompanying the seminar I already dealt with the Zulu language more precisely I tried to explain the phenomenon of the Zulu noun Besides our seminar the motivation and idea to deal with this topic has arisen from my personal experiences Since I lived and worked approximately five months in South Africa last year The Zulu language aroused my interest because it differs from all languages I know but nevertheless it includes English words or word parts This time in my term paper I will try to discuss the way of forming a relative clause in Zulu This formation usually involves a prefix also called relative concord which is attached to the predicate of a relative clause A relative clause is a subordinate clause that modifies a noun Generally in most European languages a relative clause is introduced by a relative pronoun which belongs to a special class of pronouns In other languages relative clauses may be marked in different ways they may be introduced by a special class of conjunctions called relativizers the main verb of the relative clause may appear in a special morphological variant or a relative clause may be indicated by word order alone In some languages more than one of these mechanisms may be possible Since relative clauses in Zulu were formed in a different way than in most European languages I would like to examine this problem in more detail Linguistic Atlas of South Africa Van der Merwe, I.J.,Van der Merwe, J.H.,2007-02-01 This atlas maps various time space dimensions of South Africa s remarkable linguistic diversity to cast the geography of language within the conceptual framework of

geolinguistics It shows how historical patterns of spatial language preponderance have developed to produce current patterns and allows understanding of the way landscape has become regionally ingrained in the vocabulary of languages Here language is cast as a barometer of the social dynamics processes of space and place spatial convergence regional competition expansion and dominance segregation and assimilation ethnicity social ecology language identity social interaction and migration trends    **Southern African Linguistics and Applied Language Studies** ,2008

Language in South Africa Izak J. Van der Merwe,1994 The atlas is a follow up on the Language Atlas of South Africa which was based solely on an analysis of the 1980 population census The present more comprehensive atlas is designed to serve the divergent needs of a multi lingual user community in South Africa by visually illustrating the country s changing language composition    *Language and Identities in a Postcolony* Rosalie Finlayson,Sarah Slabbert,2005 The book s chapters address issues that are important not only in Southern Africa but also in other parts of the world Although the focus and much of the data on language and identity are Southern African most of the writers deal with their material in such a way as to locate it within theoretical debates and or illuminate it with insights from related research in other parts of the world The collection belongs to the constructivist paradigm and is one of the few works within this line of research The issue of language and identity examines how language can become symbolic of the individual or group s identity This aspect of language is explored from a variety of angles exhibiting different methods of investigation and this smorgasbord of methods provides ample inspiration for further studies in the field    Genre - Based Approach to IsiZulu Home Language Education as a Means to Successful English First Additional Language Education Winfred Nonhle Zamathembu Mthembu-Funeka,2009
