Connecting Mathematics and Science to Workplace Contexts Edward Britton, 1999-06-23 Engage students through real world curriculum. It's no accident that employers complain that newly minted graduates are out of touch with the realities of work demands. Too often there is a disconnect between what is taught in the classroom and what is demanded in the workplace and students suffer the consequences. Mathematics and science curricula can play a critical role in solving this dilemma. In this comprehensive review of 23 exemplary curricula programs the authors offer an easy to use guide for tying curriculum to workplace experiences from a hematology laboratory to an agricultural setting to a soda bottling company. These programs illustrate concrete real life situations to which students can relate and derive motivation. Learn how to Meet the goals of science mathematics and technology education. Meet national curriculum standards. Chart key characteristics of successful curricula. Connect curriculum to workplace contexts. Create your own curriculum materials. This book is a must for mathematics and science educators, curriculum developers and supervisors and educators in school to work programs and vocational courses.

Connections Maths 8 Edward Duffy, Lorraine Mottershead, G. Murty, 2003 *Connections Maths 8* is the second of two dynamic textbooks and CD ROM packages that give complete coverage of the new Mathematics Stage 4 syllabus for New South Wales. Features outcomes at the start of every chapter, a dynamic full colour design that clearly distinguishes theory, examples, exercises and features. Carefully graded exercises with worked examples and solutions linked to each cartoon offering helpful hints working mathematically strands that are fully integrated. These also feature regularly in challenging sections designed as extension material which also contain interesting historical and real life context. A chapter review to revise and consolidate learning in each chapter, speed skills sections to revise and provide mental arithmetic skills, problem solving application strategies with communication and reasoning through an inquiry approach, a comprehensive Diagnostic test providing a cumulative review of learning in all chapters cross referenced to each exercise, integrated technology activities, literacy skills, developing language skills relevant to each chapter, fully linked icons to accompanying CD ROM. The student CD ROM accompanying this textbook can be used at school or at home for further explanation and learning. Each CD ROM contains animated worked examples, movies related to selected topics, offering explanation for visual learners. These feature bright energetic young presenters in appealing locations, technology files featuring formatted spreadsheets and geometry demonstrations, the entire textbook with hyperlinks to the above features.

two traditional school tests with the concept map she examines its concurrent validity and discusses its strengths and drawbacks from the viewpoint of assessing conceptual understanding. With self designed questionnaires, interviews and open ended writing tasks she also investigates students and teachers attitudes toward concept mapping and describes the implications these findings may have for concept mapping's use in school and for further research on the topic. Scholars and postgraduate students of mathematics education and teachers interested in concept mapping or assessing conceptual understanding in classroom settings will find this book an informative, inspiring and overall valuable addition to their libraries.
