The Mapmaker's Wife Robert Whitaker, 2008-11-05 In the early years of the 18th century a band of French scientists set off on a daring decade long expedition to South America in a race to measure the precise shape of the earth Like Lewis and Clark's exploration of the American West their incredible mission revealed the mysteries of a little known continent to a world hungry for discovery Scaling 16 000foot mountains in the Peruvian Andes and braving jaguars pumas insects and vampire bats in the jungle the scientists barely completed their mission One was murdered another perished from fever and a third Jean Godin nearly died of heartbreak At the expedition's end Jean and his Peruvian wife Isabel Gramesen became stranded at opposite ends of the Amazon victims of a tangled web of international politics Isabel's solo journey to reunite with Jean after their calamitous twenty year separation was so dramatic that it left all of 18th century Europe spellbound Her survival unprecedented in the annals of Amazon exploration was a testament to human endurance female resourcefulness and the power of devotion Drawing on the original writings of the French mapmakers as well as his own experience retracing Isabel's journey acclaimed writer Robert Whitaker weaves a riveting tale rich in adventure intrigue and scientific achievement Never before told The Mapmaker's Wife is an epic love story that unfolds against the backdrop of the greatest expedition the world has ever known

The Map Thief Michael Blanding, 2014-05-29 The story of an infamous crime a revered map dealer with an unsavory secret and the ruthless subculture that consumed him Maps have long exerted a special fascination on viewers both as beautiful works of art and as practical tools to navigate the world But to those who collect them the map trade can be a cutthroat business inhabited by quirky and sometimes disreputable characters in search of a finite number of extremely rare objects Once considered a respectable antiquarian map dealer E Forbes Smiley spent years doubling as a map thief until he was finally arrested slipping maps out of books in the Yale University library The Map Thief delves into the untold history of this fascinating high stakes criminal and the inside story of the industry that consumed him Acclaimed reporter Michael Blanding has interviewed all the key players in this stranger than fiction story and shares the fascinating histories of maps that charted the New World and how they went from being practical instruments to quirky heirlooms to highly coveted objects Though pieces of the map theft story have been written before Blanding is the first reporter to explore the story in full and had the rare privilege of having access to Smiley himself after he'd gone silent in the wake of his crimes Moreover although Smiley swears he has admitted to all of the maps he stole libraries claim he stole hundreds more and offer intriguing clues to prove it Now through a series of exclusive interviews with Smiley and other key individuals Blanding teases out an astonishing tale of destruction and redemption The Map Thief interweaves Smiley's escapades with the stories of the explorers and mapmakers he knew better than anyone Tracking a series of thefts as brazen as the art heists in Provenance and a subculture as obsessive as the oenophiles in The Billionaire's Vinegar Blanding has pieced together an unforgettable story of

Map Librarianship Susan Elizabeth Ward Aber, Jeremy Aber, 2016-11-04 Map Librarianship identifies basic geoliteracy concepts and enhances reference and instruction skills by providing details on finding, downloading, delivering, and assessing maps, remotely sensed imagery, and other geospatial resources and services primarily from trusted government sources. By offering descriptions of traditional maps, geographic information systems, GIS, remote sensing, and other geospatial technologies, the book provides a timely and practical guide for the map and geospatial librarian to blend confidence in traditional library skill sets. Includes rarely discussed concepts of citing and referencing maps and geospatial data, fair use, and copyright. Creates an awareness and appreciation of existing print map collections while building digital stewardship with surrogate map and aerial imagery collections. Provides an introduction to the theory and applications of GIS, remote sensing, participatory neogeography, and neocartography practices and other geospatial technologies. Includes a list of geospatial resources with descriptions and illustrations of commonly used map types and formats, online geospatial data sources, and an introduction to the most commonly used geospatial software packages available on both desktop and mobile platforms.

The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS, we take cartographic literacy for granted. We should not. The ability to find meaning in maps is the fruit of a long process of exposure and instruction. A carto-coded America, a nation in which maps are pervasive and meaningful, had to be created. The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860, maps did more than communicate geographic information and political pretensions. They became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms, where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances, and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets, parlors and bookbindings. Between the decades leading up to the Revolutionary War and the Civil War, early Americans bonded with maps. Martin Brückner's comprehensive history of quotidian cartographic encounters is the first to show us how.

American Maps and Mapmakers Walter William Ristow, 1985 The Mapmaker's Eye Jack Nisbet, 2005 Experience the sweep of human and natural history on the Columbia Plateau through the eyes of intrepid explorer and cartographer David Thompson, who established two viable trade routes across the Rocky Mountains in Canada, systematically surveyed the entire 1,250-mile course of the Columbia River, and subsequently distilled his mathematical notations into the first accurate maps of a vast portion of the northwest quadrant of North America. **Map Librarianship** Mary Lynette Larsgaard, 1978 **Transactions of the American Society of Civil Engineers** American Society of Civil Engineers, 1921
