

**Assembly**

- Inspect the internal display clip for damage before assembly. Ensure that the internal display clips are at a 90-degree angle and aren't bent or damaged.

**Important**

- If the internal display clips are damaged, you may need to replace the display.
- If you're installing a replacement display, peel the protective layer from the top and underside of it.

**Warning**

Inspect the enclosure for loose or missing screws and small parts, which can damage the battery and cause safety issues.

- Place the enclosure on the rear tray with the Lightning connector facing the bottom.

- Inspect the TrueDepth camera. Ensure that the top edge of the TrueDepth camera is under the lip of the enclosure as shown.

**Caution**

If the TrueDepth camera is positioned incorrectly, use the touch tool to move it into the correct position.

- Align the replacement display adhesive over the enclosure with the grounding tab at the bottom. Use the tool from the adhesive strip over the TrueDepth camera assembly.

**Caution**

Ensure that you've removed all adhesive residue from the display and the enclosure before you apply the replacement display adhesive.

- The replacement display adhesive has a two-sided tape, a middle release tab, and a bottom release tab. Grasp the tab on the bottom release tab. Then slowly pull the bottom release tab (1) out from under the adhesive (2) while pressing the adhesive onto the enclosure.

**Important**

Don't remove the top release from yet.

**Important**

Note: The replacement display adhesive for your model may look different from the illustration, but the steps are the same.
