Potgieter, Bianke van Rooyen, Marius H. Smit, Amos T. Thebenyane, Andre van der Bijl, Johannes (Hannes) L. van der Walt, 2019-12-12 This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings The issue of discipline is investigated from diverse paradigmatic and methodological perspectives presenting empirical as well as also philosophical research The empirical perspective includes quantitative positivistic qualitative interpretive and mixed methods pragmatic designs and worldviews This book offers a ground breaking contribution to the field of learner and student discipline with insights into disciplinary practices and issues in educational institutions not hitherto researched such as Technical Vocational Education and Training colleges and universities     **Recent Advances in Endometriosis: from Bench to Clinical Application** Achmad Kemal Harzif, Budi Wiweko, Iveta Yotova, Mila Maidarti, 2025-02-27 Endometriosis is a benign and enigmatic disease estimated to affect 6-10% of women of reproductive age It has been associated with two significant problems chronic pelvic pain and subfertility Endometriosis is an estrogen dependent disorder described as the presence of

endometrial glands and stroma outside the uterine cavity This disease may have undesirable consequences on a woman s physical and emotional well being Accordingly it may attenuate women s quality of life and productivity Likewise Endometriosis can cause substantial economic and social problems for patients families and society Despite its high prevalence cost and many published articles the pathogenesis of Endometriosis remains controversial due to the lack of robust evidence This issue may consequently restrict our understanding of the disease and decelerate innovation in diagnostic and treatment options It is now well accepted that a combination of genetic hormonal and immunological factors may contribute to the development of Endometriosis Endometriosis treatments have been primarily focused on alleviating the symptoms and not the underlying mechanisms of the disease The nature of individual influencing factors immune system and peritoneal cavity of women with Endometriosis remains to be elucidated Although the advances in research over the years have enhanced our understanding associated with hormones and their receptors immune disorder the principle of hormonal treatments for Endometriosis comprehensive and interdisciplinary approaches to disease management and awareness for patients and health care providers are compulsory to eradicate stigma intensify an accurate diagnosis and permit for new developments **EMS. ,2005** The British National Bibliography Arthur James Wells,1994 **University of California**
