Machakos 2015 2016 Intake:

Practical Applications of Medical Geology Malcolm Siegel, Olle Selinus, Robert Finkelman, 2021-08-01 This edited volume provides a framework for integrating methods and information drawn from geological and medical sciences and provides case studies in medical geology to illustrate the usefulness of this framework for crafting environmental and public health policies related to natural materials. The relevance of medical geology research to policy decisions is a topic rarely discussed and this volume attempts to be a unique source for researchers and policy makers in the field of medical geology in addressing this gap in practical medical geology applications. The book's four sections establish this framework in detail using risk assessment case studies, data analyses, and specific medical geology techniques. Following an introduction to medical geology in the context of risk assessment and risk management, the second section discusses specific methods used in medical geology in the categories of geoscience, biomedicine, and data sources. The third section discusses the medical geology of natural materials, energy use, and environmental and workplace impacts. This section includes specific case studies in medical geology and describes how the methods and data from the previous section are used in a medical geology analysis. The fourth section includes a guide to the medical geology literature and provides some examples of medical geology programs in Asia and Africa.

Handbook Of Climate Change And Agroecosystems - Climate Change And Farming System Planning In Africa And South Asia: Agmip Stakeholder-driven Research (In 2 Parts) Cynthia

Rosenzweig, Carolyn Z Mutter, Erik Mencos Contreras, 2021-04-13 This two-part handbook focuses on the work that the Agricultural Model Intercomparison and Improvement Project (AgMIP) accomplished using a new method, the AgMIP Regional Integrated Assessment Protocol, in Sub-Saharan Africa (SSA) and South Asia (SA) with funding from the UK Department for International Development. Through this research, AgMIP substantially improves the characterization and understanding of food security in SSA and SA and how it is affected by climate variability and change. The chapters in this handbook demonstrate how AgMIP has enhanced the capacity of developing country researchers and stakeholders to work together exploring and prioritizing adaptation to current and future climate stresses. Part 1 describes regional integrated assessment methods and analyses, while Part 2 presents the outcomes of farming system studies. The entire volume shows how AgMIP has established as a public good protocol for Regional Integrated Assessments that improve the capability of developing countries to address climate change challenges.
